## Cooling of the cutting edge $\rightarrow$ suction effect!

For virtually chip-free components

## No adjustment required

100% plug & play

Uncompromising face milling with suction effect MaxiMill SEC12

CERATIZIT is a high-technology engineering group specialised in cutting tools and hard material solutions.

## **Tooling a Sustainable Future**

ceratizit.com

A new level of... process security, cost-effectiveness and performance for the automotive industry

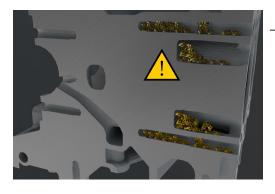

## Face milling cutter with suction effect

Our PCD MaxiMill SEC12 face milling cutter is the ideal tool for machining crankcases, cylinder heads and other components made from aluminium and non-ferrous metals in the automotive industry, the interiors of which must remain chip-free. The special design of the insert seat and cutting insert topology, supported by the coolant pressure, creates a suction effect at high speeds that clears virtually 100 percent of the chips away from the workpiece.

## The comparison

Conventional face milling vs. MaxiMill SEC12 with suction effect

#### Conventional face milling

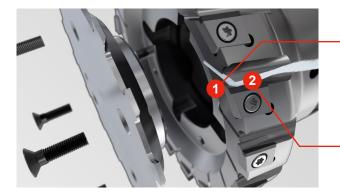

Chips are flushed into the component

Face milling with the MaxiMill SEC12

Up to 100% chip-free components thanks to suction effect

## MaxiMill SEC12 impresses with its practical application

#### Cooling of the cutting edge

Coolant cap guides coolant jet directly onto the cutting edge

#### **Suction effect**

Cutting edge geometry, cutting edge positioning and coolant jet generate a suction effect

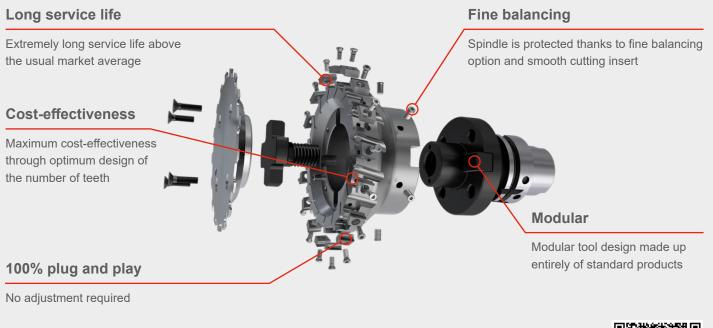

#### The most important cutting data:

- ▲ Cutting speed Vc = 2355 m/min
- ▲ Feed rate per tooth fz = 0.2 mm
- Feed rate Vf = 14,400 mm/min
- ▲ Cutting depth ap = 5 mm
- Cutting width ae = 80%
- ▲ Tool life of 40,000 components

→ This means that 40,000 crankcases can be machined per tool lifecycle in an impressive time, to a high quality and virtually chip-free

## Benefits at a glance:

The entire standard product range is available from stock. https://cutting.tools/int/en/maxmill-sec12
