WNT \ Performance

Premium quality tools for high performance.

The premium quality tools from the **WNT Performance** product line have been designed for specific applications and are distinguished by their outstanding performance. If you make high demands on the performance of your production and want to achieve the very best results, we recommend the Premium tools in this product line.

Overview

Collets

Collets for clamping the bar in the main spindle and for the sub-spindle

3-13

Stem collets

With an adapted stem for improved pick-up of the workpieces and for better secondary operation machinability

14-19

Guide bushes

Ensures bar guidance in the main spindle

20-30

Clamping sleeves

Mounting for bar feeder magazines

31-39

Reduction sleeves

With a reduction sleeve, small tools can be used directly on tool clamping points with larger mounting diameters.

Our profile collets and guide bushes are micro-eroded with up to 7 slots. This ensures maximum quality with minimal run-out tolerances.

Your wish is our command. That is why the WNT tolerances are far tighter than standard tolerances. The service lives of both the machine components and the tools are extended.

Special shapes

Due to the variety of different applications, it may be necessary to individually adapt some products to the processes.

To do this, we offer you maximum quality according to your specifications.
