The coatings for the highest performance

DRAGONSKIN

Decades of experience and the consistent demand for ongoing development can be found in the unique Dragonskin coating technology. Our innovative strength and expert know how in powder metallurgy enables us – and you – to achieve unrivalled performance in machining.

Like the invulnerability of the dragon's skin, the Dragonskin coating technology offers maximum protection against wear and its impenetrable layer is developed to function in the most adverse conditions. The result is an extremely hard and indestructible surface with a satin-like finish.

The perfect combination of state-of-the-art high-performance substrates and advanced coating structure achieves high cutting speeds and increased process security. Unlimited range of applications puts everything else to shame! A proven – **up to 80%** – increase in performance thanks to the new Dragonskin coating technology offers you a significant competitive advantage.

The Dragonskin product category helps you to quickly find and identify tools with the high-performance coating technology from CERATIZIT. All products which are marked with the Dragonskin logo represent unimaginable performance, maximum tool life, and maximum process security.
