Industrial portfolio and
raw materials supply

PLANSEE

The Plansee Group

Tungsten carbide products

Molybdenum and tungsten products

The Plansee Group is backward integrated
to raw material powder supply:

Global Tungsten & Powders supplies
tungsten and tungsten carbide powders
for both Plansee Group and external customers.
Molymet supplies molybdenum powders.

The Plansee Group

Consolidated figures as of
fiscal year 2021/22

Worldwide

 **Production sites**
Sales representations in 50 countries
46 Production sites (48)*

 **Employees**
all employee figures as of 28 February 2022,
including temporary staff

11,174

 **Sales**

236 million euros
(214)**

*A work accident is defined as follows: lost worktime at least one day, not counting day of incident; without commuting accidents.
**Figures as of fiscal year 2020/2021

Our mission

We develop, produce and market products that are based on the high-technology materials molybdenum and tungsten.

Since 100 years, we have produced powder metallurgical products that stand out in terms of their quality and availability – products that have enabled our customers to increase productivity and make major technological advances.

Our production technologies cover every step of the value chain.

It is our customers who determine how much internal added-value our products bring – whether it be powder, semi-finished or ready-to-use components. To ensure we remain the preferred partner to our customers, we continuously invest in training for our employees, in the latest technology, and in increasing our production capacity – from powder production through powder metallurgical processes to the customer-specific processing and recycling of our materials.

We tailor our customer services, development and production to suit the requirements of our markets.

The market defines what properties are required of our products. In order to best serve our different markets, we group our activities into business divisions. This ensures that we can achieve strong working relationships with all of our customers, while offering them made-to-measure product solutions. We continue this focused customer relationship management during the development and production stages.

We develop our business sustainably.

We always aim to find the right balance between social, ecological and economic goals - for the benefit and success of our customers, employees and the people at the sites where we operate. The Plansee Group has summarized its sustainability strategy in the key action areas of "attractive employer", "material and resource efficiency", "responsibility in the supply chain" and "sustainable product and technology innovation", thus creating the basis for long-term sustainability management in the Group."

Our objectives

The Plansee Group aims to be the world's leading and preferred supplier of the high-technology materials molybdenum and tungsten along the whole value chain.

The following Group objectives are valid for all divisions:

- Our business activities have market-leading positions worldwide.
- Our companies outperform the market. They are clearly positioned, profitable over the long-term, and achieve ambitious financial targets.
- The Group is an employer of choice throughout the world.

Our markets | Overview

The Plansee Group business areas achieve excellence along the whole value chain of molybdenum and tungsten production, and have proven expertise in materials, technologies and applications.

Tungsten carbide products

The CERATIZIT Group develops
and manufactures highly speciali-
zed carbide cutting tools, inserts
and rods made of hard materials as
well as hard material solutions for
wear protection.

Through the GTP division,
CERATIZIT is a processor of
tungsten ore concentrates and
secondary raw material.
The product range covers ammoni-
um paratungstate (APT), tungsten
oxides, tungsten metal powders
and tungsten carbide powders.
